

Where We Should Live for BioScript Mississauga

Solo vs. sharing with brother vs. sharing with brother + cousin. Priorities: commute, cat, greenery, backyard access, and sane rent.

Short answer

Solo at \$1,200 is mostly room/shared-house territory. Two people makes a decent basement or condo realistic. Three people gives the best shot at a house feel with space for the cat.

What we are optimizing for

ELI16: not the cheapest listing; the place that works every day.

Commute

Close to Ridgeway/Dunwin keeps work simple and avoids daily friction.

Cat

The cat needs a stable, calm space. Greenery or yard access makes a small home feel less boxed in.

Budget

\$1,200 solo is possible, but usually means a room or shared-house setup.

Sharing

Two or three people can unlock a better kitchen, laundry, storage, and outdoor access.

Budget reality		
Solo	\$1,200	Mostly room/shared-house territory
2 people	\$2,400	Realistic for 2-bed basement or condo
3 people	\$3,600	Best shot at townhouse or house-style

Recommendation

Prioritize a 3-person shared setup if everyone is reliable. Keep 2-person as the active fallback. Use solo only for an unusually strong cat-friendly house-share or basement room.
